# WATTECO

# PRESS'O

and the state

PRESS'O is a LoRaWAN® Class A transceiver designed to transfer data collected from 0-10V and 4-20mA analog interfaces. It allows to transform an existing sensor or gauges to a wireless sensor.

### **APPLICATIONS**

- Water resource management Monitor and measure water level (water tower, water tank, rainwater tank, groundwater, retention pond...).
- Building management Monitor and measure fluid level (buried oil tank, aboveground oil tank, gas tank...).
- Temperature, Humidity, air quality, pressure sensors.

#### **BENEFITS & KEY FEATURES**

- LoRaWAN<sup>®</sup>. Class A
- Easy to use and deploy
- 0-10V and 4-20mA analog input
- Stabilised and switched 10V or 14V power supply, to manage the power supply of the gauge connected to the sensor
- Differential data compression •
- Battery operated or 9-24V external power supply
- 5-year battery life (data compression mode)
- IP55

#### **CERTIFICATION**

RED, UKCA, RoHS

The PRESS'O sensor from Watteco is a long range, low power consumption, high performance and high quality LoRaWAN<sup>®</sup> Class A device that transforms any type of 0-10V, 4-20mA analog sensor into a wireless sensor.

A specific embedded electronic system is used to manage the power supply of the gauge connected to the sensor.

**PRESS'O** can operate either from a 3.6V lithium battery or from an external 9V-24V/500mV power supply.

concatenated and compressed. This unique batch mechanism significantly reduces the amount of data transmitted for demanding applications and drastically increases the autonomy up to 5 years (24 measurements per day & 1 transmission per day) when operating on battery.

### THE LARGEST IOT PRODUCTS RANGE FOR YOUR PROJECT

WATTECO is a European leader in the design and manufacture of smart IoT devices to suit all remote reading and data collection solutions.

WATTECO is a LoRa Alliance<sup>®</sup> member.
